

Zaher Karp, M.P.H.

me@zaherkarp.com · Madison, WI · linkedin.com/in/zkarp · zaherkarp.com

Healthcare data and analytics leader with 15+ years in regulated healthcare data. Player-coach manager who builds and runs production pipelines and CMS Stars quality-measure systems while managing the engineers who own them.

Experience

Baltimore Health Analytics | Manager, Data Science and Engineering Nov 2025 – Present

Medicare Advantage Stars analytics platform · MariaDB / MySQL, Python, Ruby on Rails, Perl · Remote

- Manage two data scientists, a lead and an IC; own measure methodology, pipeline reliability, and release governance while staying hands-on in code review; coordinate delivery with back-end, QA, and front-end partners
- Build and modernize measure pipelines: HEDIS measures and a legacy Perl pharmacy-claims loader feeding Part D adherence, with CMS-specification logic
- Built a self-service dashboard for forecast-versus-actual Star Ratings cutpoint review, replacing manual spreadsheet and prod-dependent in-app workflows; adopted by data science and the CEO as a shared review surface

Health Catalyst | Healthcare Analytics Manager Aug 2020 – Aug 2025

AWS (S3, Redshift, QuickSight) · Azure / Databricks · dbt, Python, T-SQL · Sisense, Power BI · Remote

- Owned the post-acquisition migration of all analytics to the multi-cloud stack and redesigned the data model for the new requirements
- Re-architected AWS S3 storage with lifecycle policies and partitioning: cut monthly storage cost ~50% and weekly load latency by 24+ hours
- Built a benchmark-driven billing dashboard tracking \$MM+ in revenue and value-based risk-sharing, used in monthly executive business reviews
- Standardized SQL into reusable stored procedures (~70% codebase reduction); improved EHR data quality with RxNorm standards and fuzzy matching

Healthfinch | Healthcare Analytics Manager (first analytics hire, promoted from Specialist) Dec 2017 – Jul 2020

~45-person Series B clinical decision-support startup, acquired by Health Catalyst · SQL, Python, Clojure, Ruby, Sisense, AWS (S3, Redshift), Epic Clarity · Madison, WI

- Built a HIPAA- and HITRUST-compliant analytics platform from scratch with a star-schema model unifying app data and four EHR systems
- Authored reusable Epic Clarity report libraries deployed across 50+ health systems
- Designed governed Sisense / Periscope dashboards with shared semantic layers: absorbed 7× user growth and saved 400+ prep hours per quarter
- Led the sales-analytics initiative; built an ROI dashboard that contributed to \$1M+ in new recurring revenue

University of Wisconsin School of Medicine and Public Health | Researcher Sep 2009 – Jun 2018

Family Medicine, Internal Medicine, Pediatrics, Population Health · SAS, Stata, R, SQL, Epic · Madison, WI

- Authored the ACO / MSSP (Medicare Shared Savings) analysis using total cost of care and federal cancer-screening reports; 7 publications and conference proceedings
- Contributed to ~\$1.09M in funded research; compliance manager on six grants

Education

University of Wisconsin-Madison: M.P.H., Biostatistics (2015) · Graduate Certificate, Patient Safety / Human Factors Engineering (2015) · B.A., English Literature (2007)

Skills

Engineering & data: SQL (T-SQL, PostgreSQL, MySQL / MariaDB, Redshift, Oracle) · Python (pandas, PySpark) · dbt · Ruby on Rails · Clojure · Perl · SAS · Stata · R · git

Cloud & BI: AWS (S3, Redshift, QuickSight) · Azure / Databricks · Okta SSO / RBAC · Sisense · Periscope · Power BI · Grafana · Datadog

Healthcare: HEDIS · CMS Medicare Stars · ACO / MSSP · HIPAA · HITRUST · ICD-10 · RxNorm · HL7 · Epic · Cerner · Veradigm · athenahealth
